

As you consider LPFM service expansion to include priority over current FM translator services, I'm sure you are aware of the ramifications to these services.

If, for example, services such as K-LOVE were to be supplanted by LPFM stations, it's possible we may lose this service in our area, and that would be a serious loss, both nationally and locally.

K-LOVE is widely listened to by Contemporary Christian Music lovers of all ages. The benefits of this service are evidenced by the fact that it is entirely listener-supported.

Since the proposed expansion of LPFM jeopardizes the very existence of this and many other listener-valued services, I ask you to consider designing this expansion in a way that would not threaten the widely-listened-to services that so many people all across the USA now enjoy.

Thank you for allowing me to comment.
